Log files

The log files are user specific and can be located in the following folder:

- C:\Users\{username}\AppData\Local\Remind Me

Note: Replace {username} with your actual Windows username. If you're not sure what your username is, go to the Start menu and open up the Task Manager. Click the Users tab to see your username.

Status

Current status of the application. This information is also available by hovering over the tray icon.

Email

Only valid emails will be allowed. Used for account identification.

ID

If using the full version, your activation ID goes into this field.

Note: To make sure everything works correctly, please ensure that Email and ID match your registration information.

Run when starting Windows

If checked, this will run the application when starting Windows.

Check for updates

If checked, this allows the application to check for updates when starting. No other information is transferred and the application will only connect to the LP23.com servers.

Tray icon

Color will vary depending on the current state of the site being accessed. A number may also be displayed as well.

General:

- White: No operations are available for this site.
- Red: There is an issue that needs to be addressed.
- Green, Blue, Yellow: See below for site specific operations.

Shopping Sites:

- Green: This item is not being watched.
- Blue: This item is being watched for changes.
